

1. **What specific questions/problems you will work on for deliverable 4? Capstone I, II, and SE students: make sure that your plan refers to specific issues in your GitHub repo (add issue links to your plan). AI students: list specific goals of this deliverable.**

This week we have decided to try out different values of hyperparameters for the models that we have implemented (VGG16 & Inception V3). The hyperparameters include learning rate, drop rate, etc.

2. **How will you demonstrate your success at the end of deliverable 4.**

The demo of this week's deliverable will be submitted as a report containing the progress we have made in this deliverable.
